PAGE
1 OF 7

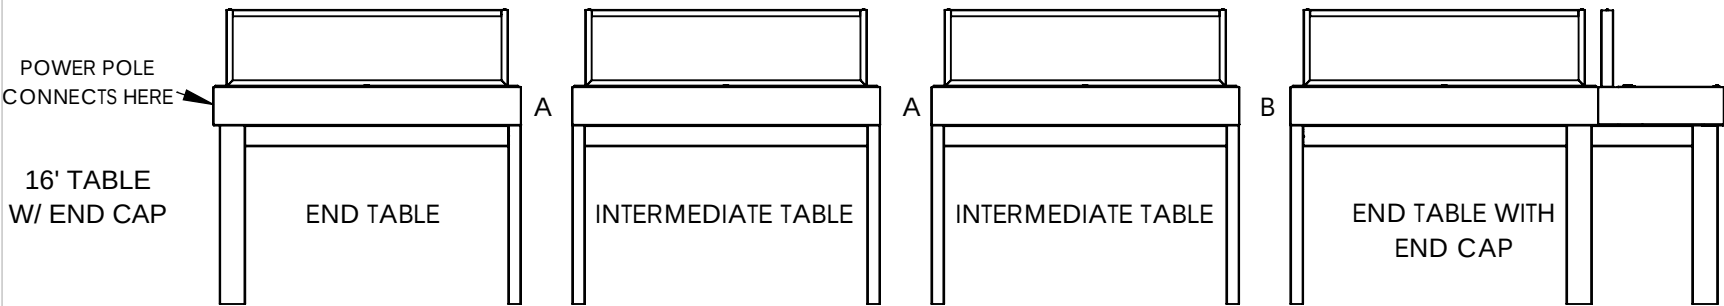

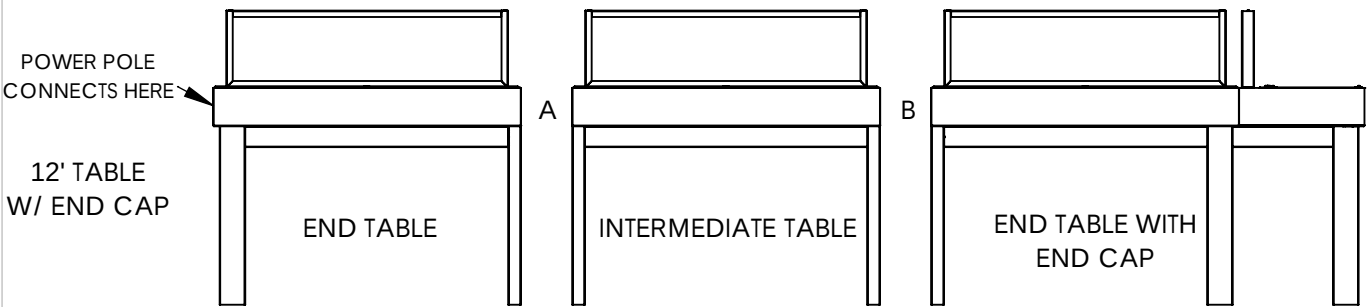

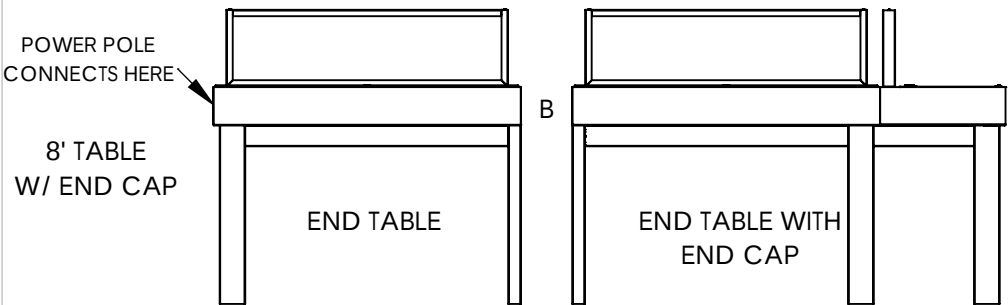

A minimum of 4 associates are recommended for lifting tables off pallets.

Ensure all preinstalled power strips inside tables are turned to the ON position.

Step 1: Starting with end tables, locate tables per floor plan. The end of the end table with 4"x4" legs should face the power pole.

Step 2: Connect wires between sections, and tuck wires into one of the tables. Slide tables together, ensuring that wires are not hanging between the tables.

The end of the intermediate tables with male plugs should face the end table. For sections labeled "B", only the power cords will be connected.

SECTION A

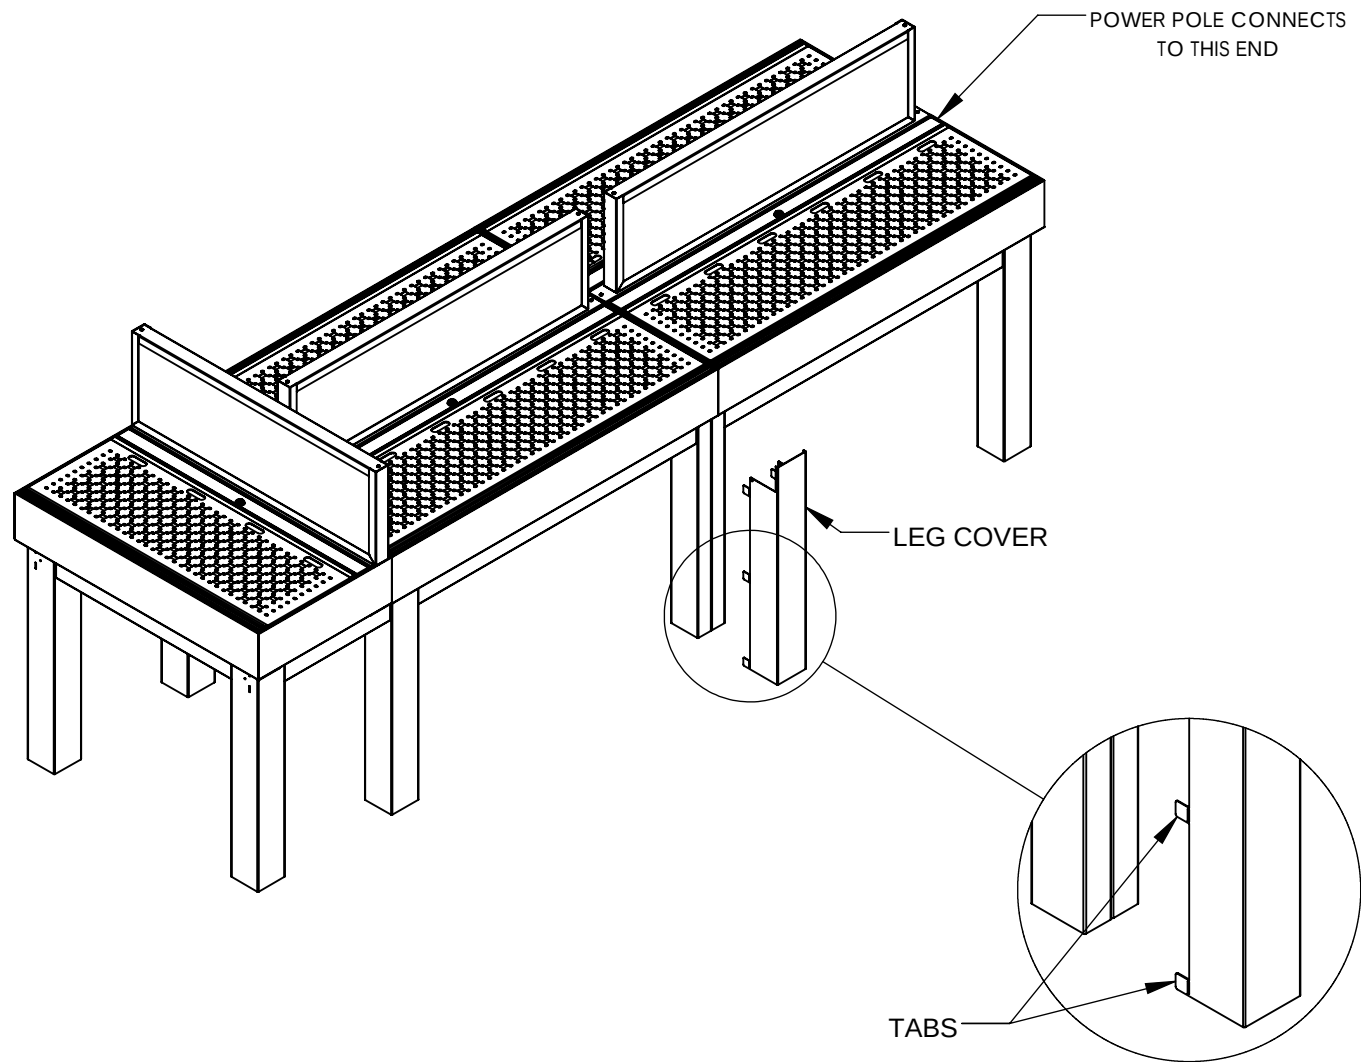

MALE PLUGS

SECTION B

Step 3: Slide leg covers over 2"x4" table legs. Bend tabs to lock leg covers to table legs.

Step 4: Plug power cord from end table into power pole and attach power pole to end table.

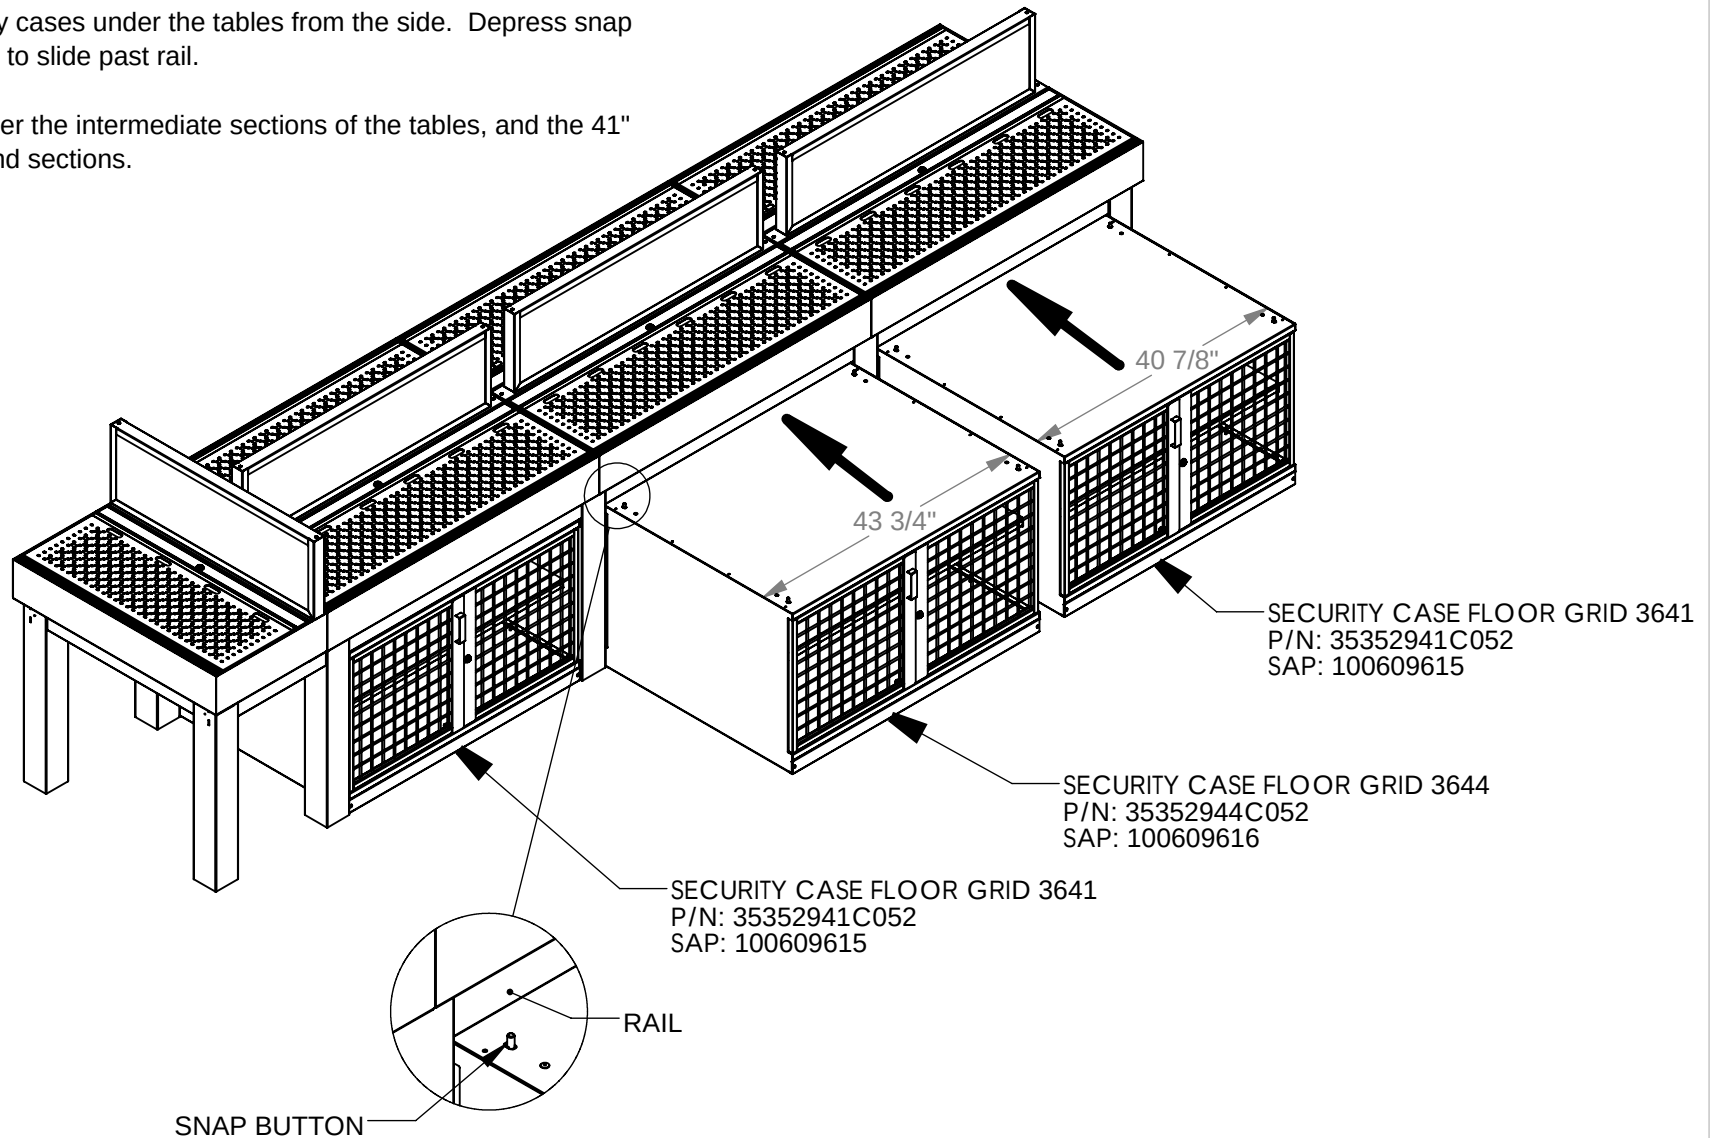

OPTIONAL: UNDER TABLE SECURITY CASES

A minimum of 2 associates are recommended for lifting cases off pallets.

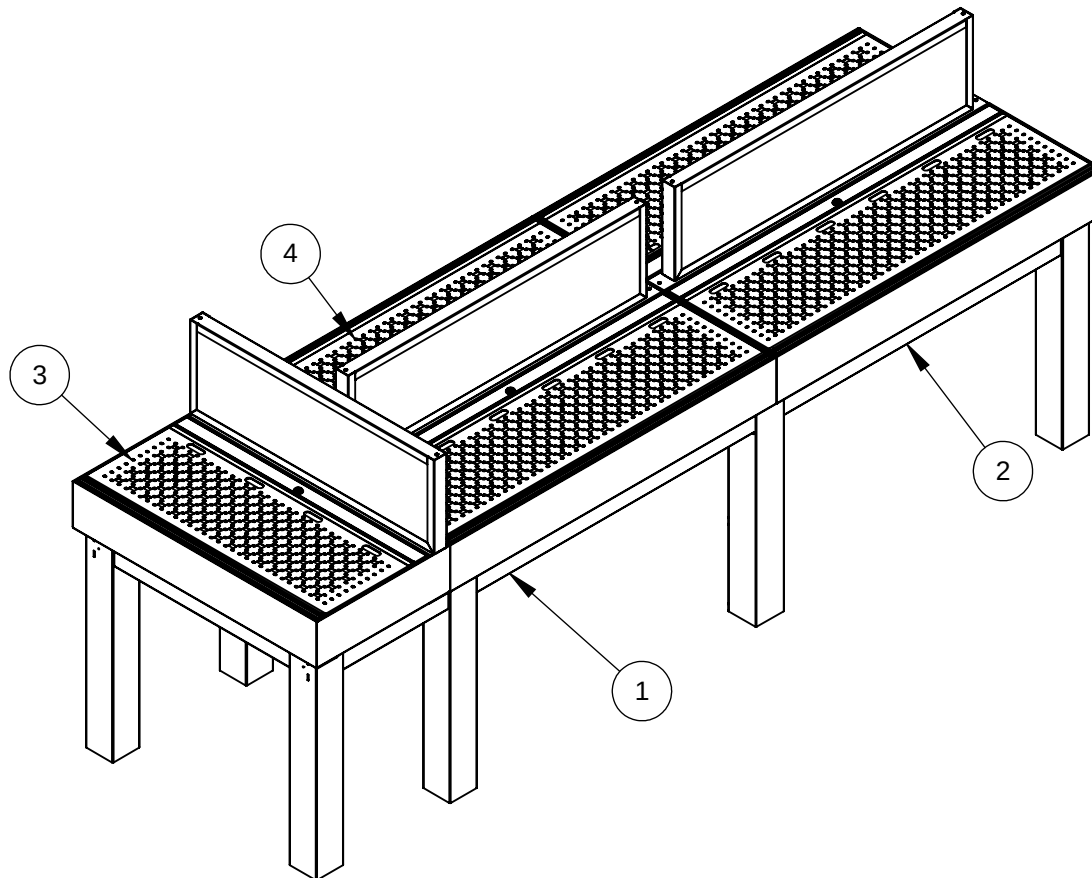

Step 5: Slide security cases under the tables from the side. Depress snap buttons to allow case to slide past rail.

The 44" cases fit under the intermediate sections of the tables, and the 41" cases fit under the end sections.
